

# NexaWorks - Proposal

Response to RFP-2026-017: Cloud Procurement Analytics Platform for Northwind Retail Group  
Submission date: 2026-03-02 | Fictional document for classroom use

## 1. Executive Summary & Understanding of Requirement

NexaWorks proposes a balanced, low-risk delivery of a procurement analytics platform on AWS, combining a proven product with a disciplined, phased implementation and a strong run-and-support model.

Our understanding: Northwind requires consolidated spend visibility across 14 business units, supplier performance scorecards and contract compliance reporting, with a smooth hand-over to internal teams.

## 2. Proposed Solution & Implementation Approach

Solution: NexaInsight platform on AWS (Redshift, Glue, QuickSight embedded) with standard connectors for SAP S/4HANA and Coupa, and a documented REST API for further integrations. Scales to 20 million spend lines in our current benchmark; larger volumes use Redshift concurrency scaling.

Implementation approach: agile delivery in four phases with fortnightly demos, a joint steering committee and a documented RACI. Data quality rules are agreed in discovery and monitored continuously.

## 3. Timeline, Team Structure & Milestones

| Phase                         | Timing      | Milestone                                     |
|-------------------------------|-------------|-----------------------------------------------|
| Phase 0 - Mobilisation        | Weeks 1-2   | Project charter, RACI, risk register baseline |
| Phase 1 - Discovery & design  | Weeks 3-6   | Data model and KPI catalogue signed off       |
| Phase 2 - Build (3 sprints)   | Weeks 7-14  | SAP + Coupa pipelines, 12 dashboards          |
| Phase 3 - Test & training     | Weeks 15-18 | UAT sign-off, 60 users trained                |
| Phase 4 - Go-live & hypercare | Weeks 19-22 | Go-live wk 19, hypercare to wk 22             |

**Team:** Delivery director (steering), full-time project manager, solution architect, 2 data engineers, BI developer, test lead, change & training lead (8 FTE). Named PM: Samuel Okafor, PMP, 7 similar programmes.

## 4. Pricing

| Item                                     | Cost (USD) |
|------------------------------------------|------------|
| NexaInsight licence (3 years)            | \$390,000  |
| Implementation (fixed price)             | \$285,000  |
| Connectors SAP + Coupa                   | \$60,000   |
| Training & change management             | \$40,000   |
| 24x7 support & managed service (3 years) | \$120,000  |
| Total                                    | \$895,000  |

### Assumptions:

- AWS consumption estimated at \$4,200/month and billed at cost.
- Fixed price covers the listed scope; 10% contingency held for agreed change requests.
- Milestone-based payments: 20% / 30% / 30% / 20%.

## 5. Security, Compliance & Risk Controls

- SOC 2 Type I report available; SOC 2 Type II audit window in progress (report due Q3 2026).
- Encryption at rest (AWS KMS) and in transit (TLS 1.2+); SSO via SAML 2.0.
- Role-based access by business unit; audit logging of all user and admin actions.
- GDPR DPA provided; data hosted in AWS eu-west-1.

### Risk management:

- Weekly risk and issue review with the steering committee; top risks with owners and dates.
- Data quality risk mitigated through automated validation rules and a data-owner sign-off gate.
- Resource risk mitigated with a named backup for each key role.

## 6. Support Model, Experience & References

**Support:** 24x7 support with contractual SLAs: P1 response 30 minutes / restore 4 hours, P2 response 2 hours. Dedicated technical account manager, monthly service reports, 90-day hypercare, and a knowledge-transfer plan so Northwind can self-serve new dashboards.

**Relevant experience:** Six procurement analytics implementations in retail and consumer goods since 2020.
