

Delta Analytics - Proposal

Response to RFP-2026-017: Cloud Procurement Analytics Platform for Northwind Retail Group
Submission date: 2026-02-24 | Fictional document for classroom use

1. Executive Summary & Understanding of Requirement

We propose a standard procurement analytics service for Northwind based on our packaged dashboards, delivered by a small experienced team.

We understand Northwind needs consolidated spend reporting and supplier scorecards across its business units.

2. Proposed Solution & Implementation Approach

Hosted analytics platform on Azure with a certified SAP S/4HANA connector and nightly CSV import for Coupa. Tested with 10 million spend lines. Standard spend, supplier and contract dashboards.

Delivery follows a waterfall plan with a weekly status report and a monthly steering meeting.

3. Timeline, Team Structure & Milestones

Phase	Timing	Milestone
Design	Weeks 1-4	Design document approved
Build	Weeks 5-12	Dashboards built
Test & train	Weeks 13-15	UAT sign-off
Go-live	Week 16	Production go-live

Team: Project manager, solution architect, 2 data engineers, BI developer (5 FTE).

4. Pricing

Item	Cost (USD)
Licence (3 years)	\$360,000
Implementation (fixed price)	\$240,000
SAP connector	\$40,000
Support (3 years)	\$90,000
Total	\$730,000

Assumptions:

- Azure consumption billed at cost, estimated at \$3,000/month.
- Coupa data provided as nightly CSV exports by Northwind.

5. Security, Compliance & Risk Controls

- ISO/IEC 27001 certified. Encryption at rest and in transit. SSO via SAML 2.0.
- Role-based access; audit log retained for 1 year. GDPR DPA available.

Risk management:

- Monthly risk review; top risks tracked in a shared register.

6. Support Model, Experience & References

Support: Business-hours support with 4-hour response for critical incidents; quarterly service reviews.

Relevant experience: Four procurement analytics projects for mid-sized retailers since 2021.

References:

- Two retail references available after shortlisting.
